Summary

8+ years in DevOps, platform, and infrastructure engineering with deep AWS and GCP experience. Managing a hybrid EKS + GKE platform handling 50K+ RPS for 2M+ monthly users at 99.99% uptime with zero-drift Terraform. Proven track record in scaling container workloads, AI infrastructure (vLLM), and building robust CI/CD automation.

Technical Skills

- **Cloud & IaC:** AWS (EKS, EC2, S3, SQS, CloudFront, ALB), GCP (GKE, Pub/Sub), Azure (AKS), Terraform, Ansible
- **Orchestration & CI/CD:** Kubernetes, ECS, Karpenter, HPA, ArgoCD, GitHub Actions, GitLab CI
- **Observability & Data:** Prometheus, Grafana, Loki, Datadog, PostgreSQL, Redis, DynamoDB
- **Security, SRE & Code:** OPA/Gatekeeper, SLOs/SLIs, HIPAA, SOC 2, Python, Bash, Node.js

Professional Experience

IS Auditr INC - Senior DevOps Engineer (Nov 2021 – Present)

- Owned hybrid AWS EKS + GCP GKE platform (50K+ RPS, 2M+ MAU, 99.99% uptime) with a zero-drift Terraform module library.
- Set up ArgoCD GitOps with canary releases, gating deployments on SLO burn rates via Prometheus and Grafana.
- Engineered automated GPU autoscaling for vLLM on Kubernetes (spot GPUs + scale-to-zero) for generative AI model serving.
- Built event-driven autoscaling with Pub/Sub feeding HPA custom metrics to handle massive 10x peak traffic bursts safely.
- Built an IDP for service scaffolding and rolled out OPA/Gatekeeper across clusters to enforce compliance within CI/CD.

Vedana Studio INC - DevOps Engineer (Aug 2017 – Nov 2021)

- Migrated healthcare applications to Azure AKS with zero downtime, building continuous delivery and DevSecOps pipelines.
- Led a team breaking monolithic architectures into 15+ containerized microservices, accelerating releases from monthly to weekly.
- Managed HIPAA and ISO 27001 compliance workflows (encryption, access management, logging), reducing audit prep to 3 days.

- Migrated petabyte-scale genome infrastructure from AWS to Azure with zero data loss using custom Terraform/Ansible modules.
- Designed AWS/Kubernetes deployment patterns for startup clients, effectively reducing their cloud expenditures by 35%.

Education

Lovely Professional University | B.Tech, Computer Engineering (2013 – 2017)
